

10 — 19 September 2024

 Padua —  ITER Headquarters

# RIDE FOR FUSION

## JOIN US!

If you are a keen cyclist or just want to push the pedal for fusion energy, then join the Ride4Fusion from **Padua**, Italy, to the **ITER Headquarters**.

Inspired by the historical cycling relay "Scholares Vagantes" from University of Padova, teams from the Consorzio RFX and ITER will cycle in **10 stages through northern Italy and Provence promoting the quest for fusion energy**.

If you are interested to join this quest (or to selected legs), please contact

[sabina.griffith@iter.org](mailto:sabina.griffith@iter.org)

The start will be in Padua on **Tuesday, 10 September 2024**. The Eurovelo 8 route leads via Cremona, Piacenza, Pavia, Asti, Cuneo to Ventimiglia at the French border, where the Italian team will be joined by the ITER cycling team. Together they will then ride via Cannes, Toulon and Marseille to the ITER Headquarters where the "equipes fusionne" are expected to arrive on **Thursday, 19 September**.

Stop-overs will be held in **Piacenza** at Politecnico Milano Campus, and in **Pavia** at the Museum of Electrical Technology of the University of Pavia, where the team will engage with the local communities, also celebrating 65 years of fusion science in Italy. In **Marseille** the cyclists will join up with the fusion students and teachers of the Aix-Marseille University before they depart for the last leg towards the finishing line at **ITER Headquarters**.

The trip will be documented by video and photo cameras.

If you are interested to join this quest (or to selected legs), please contact
